Calculus II

Integrals of the form $\int \ln(mx)\mathbf{d}x$

Todor Milev

2019

Integration by parts: $\int u\mathrm{d}v = uv - \int v\mathrm{d}u.$

Example

$$\begin{aligned}
\int \ln x\mathrm{d}x &= (\ln x)x - \int x\mathrm{d}(\ln x) \quad \Big| \text{ integrate by parts} \\
&= x\ln x - \int x(\ln x)'\mathrm{d}x \\
&= x\ln x - \int x\frac{1}{x}\mathrm{d}x \\
&= x\ln x - \int \mathrm{d}x \\
&= x\ln x - x + C \quad .
\end{aligned}$$
