

Calculus II

Integrals of the form $\int \ln(mx) dx$

Todor Milev

2019

Integration by parts: $\int u dv = uv - \int v du.$

Example

$$\begin{aligned}
 \int \ln x dx &= (\ln x)x - \int x d(\ln x) && \left| \text{integrate by parts} \right. \\
 &= x \ln x - \int x (\ln x)' dx \\
 &= x \ln x - \int x \frac{1}{x} dx \\
 &= x \ln x - \int dx \\
 &= x \ln x - x + C .
 \end{aligned}$$
