

Precalculus

Compute parabola with given vertex and passing through a point

Todor Milev

2019

Example

Write an equation of a parabola with vertex at (1, 2) that passes through the point $(2, \frac{3}{2})$.

$$a(x - h)^2 + k = y$$

$$a(x - 1)^2 + 2 = y$$

$$a(2 - 1)^2 + 2 = \frac{3}{2}$$

$$a = \frac{3}{2} - 2 = -\frac{1}{2}$$

$$y = -\frac{1}{2}(x - 1)^2 + 2$$

$$y = -\frac{1}{2}x^2 + x + \frac{3}{2}$$

Standard form

Vertex at (1, 2)

Passes through $(2, \frac{3}{2})$
