

Calculus I

Basic trig integrals, part 2

Todor Milev

2019

Example

Find the general indefinite integral.

$$\int \frac{\cos \theta}{\sin^2 \theta} d\theta$$

Example

Find the general indefinite integral.

$$\int \frac{\cos \theta}{\sin^2 \theta} d\theta = \int \left(\frac{1}{\sin \theta} \right) \left(\frac{\cos \theta}{\sin \theta} \right) d\theta$$

Example

Find the general indefinite integral.

$$\begin{aligned}\int \frac{\cos \theta}{\sin^2 \theta} d\theta &= \int \left(\frac{1}{\sin \theta} \right) \left(\frac{\cos \theta}{\sin \theta} \right) d\theta \\ &= \int \text{?} \quad \text{?} \quad d\theta\end{aligned}$$

Example

Find the general indefinite integral.

$$\begin{aligned}\int \frac{\cos \theta}{\sin^2 \theta} d\theta &= \int \left(\frac{1}{\sin \theta} \right) \left(\frac{\cos \theta}{\sin \theta} \right) d\theta \\ &= \int \csc \theta? \quad d\theta\end{aligned}$$

Example

Find the general indefinite integral.

$$\begin{aligned}\int \frac{\cos \theta}{\sin^2 \theta} d\theta &= \int \left(\frac{1}{\sin \theta} \right) \left(\frac{\cos \theta}{\sin \theta} \right) d\theta \\ &= \int \csc \theta \text{?} \quad d\theta\end{aligned}$$

Example

Find the general indefinite integral.

$$\begin{aligned}\int \frac{\cos \theta}{\sin^2 \theta} d\theta &= \int \left(\frac{1}{\sin \theta} \right) \left(\frac{\cos \theta}{\sin \theta} \right) d\theta \\ &= \int \csc \theta \cot \theta d\theta\end{aligned}$$

Example

Find the general indefinite integral.

$$\begin{aligned}\int \frac{\cos \theta}{\sin^2 \theta} d\theta &= \int \left(\frac{1}{\sin \theta} \right) \left(\frac{\cos \theta}{\sin \theta} \right) d\theta \\ &= \int \csc \theta \cot \theta d\theta \\ &= ?\end{aligned}$$

Example

Find the general indefinite integral.

$$\begin{aligned}\int \frac{\cos \theta}{\sin^2 \theta} d\theta &= \int \left(\frac{1}{\sin \theta} \right) \left(\frac{\cos \theta}{\sin \theta} \right) d\theta \\ &= \int \csc \theta \cot \theta d\theta \\ &= -\csc \theta\end{aligned}$$

Example

Find the general indefinite integral.

$$\begin{aligned}\int \frac{\cos \theta}{\sin^2 \theta} d\theta &= \int \left(\frac{1}{\sin \theta} \right) \left(\frac{\cos \theta}{\sin \theta} \right) d\theta \\ &= \int \csc \theta \cot \theta d\theta \\ &= -\csc \theta + C\end{aligned}$$
