# **Precalculus Transform inequality to interval**

**Todor Miley** 

2019

#### **Definition**

Let A and B be sets.

- The union of A and B is the set consisting of the elements in A and the elements in B, without additional elements.
- The union of A and B is denoted by

 $A \cup B$ 

## Example

Plot the points in the set  $[-1,1) \cup (2,3]$ .

Plot the points in the set  $[-1,2) \cup (1,3]$ .

To draw the points of a union draw both on top of one another.

#### Definition

Let A be a set. The notation

$$x \in A$$

is read as

- x belongs to A or
- x is an element of A.

## Example

Express the statement  $-1 < x \le 2$  using the  $\in$  symbol and the interval notation.

$$x \in (-1, 2]$$

Express the statement x < 0 or  $1 \le x < 2$  using the  $\in$  symbol and the interval notation.

$$x \in (-\infty,0) \cup [1,2)$$
